

IN THE DRAWINGS

Please correct Figure 8 as shown in red in the red-line copy of Figure 8 submitted concurrently herewith.

IN THE SPECIFICATION

Please replace the abstract with the following paragraph:

ABSTRACT

 In one embodiment, when a problem with a consumer electronic device owned by a user is identified, a diagnostic procedure is provided to control the diagnosis of the potentially faulty consumer electronic device by a testing consumer electronic device. The testing consumer electronic device is a local device owned by the user that is operable to diagnose problems associated with the potentially faulty consumer electronic device. In one embodiment, the testing consumer electronic device and the potentially faulty consumer electronic device are part of a home network enabling their communication during the diagnosis. In another embodiment, the testing consumer electronic device and the potentially faulty consumer electronic device can communicate only during the diagnosis using a special purpose connectivity means. In yet another embodiment, the testing consumer device and the potentially faulty consumer electronic device can communicate using their user interfaces.
